

Foundations of Naturopathic Medicine Project

Codifying our knowledge.

It's time.

Please join us!

Now is the time when naturopathic professionals can come together to create a powerful tool that will set naturopathic medicine in its rightful place as a leader in health care, health promotion, and the prevention of disease. The objective of the **Foundations of Naturopathic Medicine Project** is to **codify the knowledge** that makes Naturopathic medicine unique and to **produce a textbook** that will solidify the professional standard and presence of Naturopathic medicine in North America and the world. The *Project's* academic home is **National College of Natural Medicine** in Portland Oregon, North America's oldest, accredited college of Naturopathic medicine. Over 300 participants from 12 countries including representatives from all of the naturopathic colleges in the United States, two naturopathic Canadian colleges, and Southern Cross University in Australia are working together on the *Project* and textbook. *Elsevier* is poised to publish and internationally distribute the final product in 2014. **Without the vision, heart, and commitment of the naturopathic professionals who are dedicating and volunteering their time and knowledge to this Project, this work would not be possible.**

As a Naturopathic medicine scholar, practitioner, advocate, or consumer **we invite you to join us in this landmark effort** by financially supporting the *Project* and providing the funds necessary to cover costs related to convening and managing editors, contributors, and synthesis team; developing and overseeing the virtual platform created for author dialogue and online learning; planning and producing Symposium; and creating the final text.

As a Friend of the Foundations of Naturopathic Medicine Project you will be recognized as one of the visionary sponsors who brought together an extraordinary group of naturopathic scholars, physicians, leaders, and key experts from around the world to create the first international medical textbook on the philosophy, principles and practice of Naturopathic medicine in over 100 years.

**Help us capture the HEART of Naturopathic medicine.
Your contribution today will powerfully influence health care for years to come!**

Gifts made to the Foundations of Naturopathic Medicine Project/NCNM are eligible for a tax deduction.
